🖥 PROJECTS

PHOTO-EDITING PROGRAM   JAN 2020 - APR 2020

Worked in an agile team of 4 to iteratively and incrementally design, implement, and test the photo-editing program. I took leader position where I organized and facilitated team meetings, addressed team conflicts, and communicated with the teaching assistants and instructor. The photo-editing program allows users to apply a variety of image filters to their images.

Python | CIMPL

E-COMMERCE APPLICATION   JAN 2021 - APR 2021

Developed a prototype for a virtual store interface using Java. Implemented OO Design to allow the user to browse products, add products to a virtual cart, and checkout. This project is not web-based.

Java | IntelliJ IDEA | UML Diagrams

ELECTRIC PLANE RESEARCH PROJECT   SEP 2022 - NOV 2022

Conducted a research proposal for the Deep Blue Cleanup and professor that led to work being published. Presented university-level engineering material to a non-technical audience.

Word | Excel | Google PowerPoint

🎓 EDUCATION

2019 - Present   Bachelor's Degree in **Software Engineering** at **Carleton University**
